SUMMARY

I am a Software Engineer with 3 years of experience building backend services, full-stack applications and AWS solutions. Strong JavaScript and TypeScript background across Node.js, React and relational databases, with current experience in Adobe Commerce (Magento 2), NetSuite and Celigo integrations.

WORK EXPERIENCE

Software Engineer | The Fruit Box Group

June 2024 – Present

Report directly to the CTO, developing e-commerce platforms, integrations and internal operational applications.

- Built and delivered the Driver Check application using Node.js (Express), React, AWS Lambda and DynamoDB, saving over A\$100,000 in software licence costs annually and enabling drivers to create, edit and synchronise HACCP reports with NetSuite.
- Collaborated closely with Customer Service and Marketing teams to develop and implement promotional campaigns, system enhancements, and data-driven features aligned with business requirements.
- Performed bug fixing, optimisation, and feature enhancements on the existing Adobe Commerce (Magento 2) platform using PHP, following best practices and version control workflows.
- Designed, developed, and maintained integrations to ensure reliable data flow between Adobe Commerce (Magento 2) e-commerce system and NetSuite ERP, supporting orders, customers, and transaction synchronisation.
- Responsible for requirements gathering, technical planning, and cross-department communication to deliver solutions that met both technical and business needs.
- Delivered product catalogue automation between e-commerce platforms Adobe Commerce and WordPress, including product categories and NetSuite price-tier mapping.

Software Developer | Partners in Planning – Australia

February 2022 – June 2022

- Worked closely with Business Analysts to conduct comprehensive user interviews and requirement-gathering sessions.
- Translated gathered requirements into clear and concise user stories, which provided a clear vision of the application requirements to the development team.
- Developed end-to-end full-stack dynamic web applications (JavaScript, PHP & CakePHP), including financial solutions, financial chatbot, debt, insurance, and interest rate calculators.
- Prepared user and technical documentation and collaborated with QA to support software quality.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, C#, PHP
- **Front-end:** React, Next.js, Redux Toolkit, HTML, CSS, Tailwind CSS
- **Back-end:** Node.js, Express, Nest.js, ASP.NET Core, Adobe Commerce, Magento 2, CakePHP
- **Database:** PostgreSQL, MySQL, DynamoDB, MongoDB, Microsoft SQL Server.
- **Cloud and Tools:** AWS: Lambda, EC2, ECS, S3, RDS, CloudFront; Docker; Git
- **Platforms and delivery:** Adobe Commerce / Magento 2, NetSuite ERP, Celigo, WordPress, Customer.io, Zendesk CRM, Amplitude, RudderStack, Sentry, New Relic.
- **AI-assisted development:** OpenAI Codex for implementation, debugging and refactoring, with manual code review and testing.

EDUCATION

MONASH UNIVERSITY

May 2019 – September 2023

- **Bachelor of Business:** Specialisation in Accounting.
- **Bachelor of Information Technology:** Specialisation in Software Development, Web Development.
