HONG KIEN NGUYEN (BILL)

FULL STACK SOFTWARE ENGINEER | PRODUCT DELIVERY

Melbourne, VIC | +61 452 160 479 | nguyenhongkien26@gmail.com | LinkedIn
Portfolio: 2604kien.github.io | GitHub: github.com/2604kien

PROFILE

Full Stack Software Engineer specialising in React, TypeScript, Node.js and AWS. Delivers applications and business integrations that automate workflows and reduce operating costs.

WORK EXPERIENCE

Software Engineer | The Fruit Box Group Jun 2024 – Present

Own application delivery from requirements and technical design through deployment and support. Work directly with the CTO, incorporate feedback from Marketing and Customer Service, and collaborate with Aligent on Fruit Box Connect (FBC).

- Built Driver Check with React, Node.js/Express and AWS, enabling drivers to submit delivery and vehicle reports without full NetSuite licences. Integrated the app with NetSuite through Celigo for HACCP reporting, saving an estimated A$100,000 in annual licence costs.
- Delivered a React, Node.js/Express and AWS quote application, replacing a WordPress form with a custom product catalogue, pricing and customer event tracking. Integrated submissions with NetSuite through Celigo, removing manual quote entry for Customer Service.
- Improved FBC–NetSuite integration performance by consolidating backend Magento 2 (PHP) requests and simplifying workflow steps, reducing integration flows runtime from 10-30%.
- Developed gifting marketplace features with Magento and React, allowing customers to discover partner products through The Fruit Box website. Integrated purchases made on partner websites with NetSuite order creation through Celigo.
- Implemented SFTP and backend APIs to receive orders from HelloFresh, then built Celigo integrations to automate order creation, closure and cancellation in NetSuite.
- Automated WordPress catalogue publishing through Celigo, combining Adobe Commerce (Magento 2) product data with NetSuite pricing tiers. Built an Express.js and AWS Lambda proxy to provide secure access to WordPress.

Full Stack Engineer | Jung Talents Jun 2022 – Jun 2024

- Developed web applications and microservices using JavaScript/TypeScript, React, Next.js and Node.js, with Express, NestJS and ASP.NET Core across projects.
- Worked with Business Analysts and QA engineers in cross-functional Agile teams to deliver software aligned with client requirements.
- Implemented AWS solutions using EC2, Lambda, ECS, S3 and RDS, with Docker containerisation to support application deployment.
- Conducted code reviews and provided constructive feedback to team members to support software quality.

Software Developer Intern | Partners in Planning Feb 2022 – Jun 2022

- Developed full-stack features for Advice Cyborg using JavaScript, PHP and CakePHP, including a financial chatbot and debt, insurance and interest-rate calculators.
- Worked with Business Analysts on user interviews and requirements gathering, translating findings into user stories for the development team.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, C#
Front end: React, Next.js, Redux Toolkit, HTML, CSS, Tailwind CSS
Back end: Node.js, Express, NestJS, CakePHP, ASP.NET Core
Databases: PostgreSQL, MySQL, DynamoDB, MongoDB
Cloud & delivery: AWS (Lambda, API Gateway, S3, CloudFront, EC2, ECS, RDS), Bitbucket Pipelines, Docker, Git
Integrations: Adobe Commerce (Magento 2), NetSuite, Celigo, WordPress, Zendesk

EDUCATION

Monash University May 2019 – Sep 2023

Bachelor of Information Technology — Software Development and Web Development
Bachelor of Business — Accounting
